

PROTECT YOUR WARRANTY

A/C COMPRESSORS

ONE VALIDATE DIAGNOSIS

- Did you know it is important to check the entire system, including the operating pressures which can be found in the Haynes Techbook.
- Did you check for restrictions?
 - Ensure correct engine cooling systems operations,
i.e. Radiator, electric fan, fan clutch, fan blades & fan shroud.

TWO BEFORE LEAVING AUTOZONE

- Always replace the receiver drier/accumulator and expansion device to validate your warranty
- Purchase refrigerant, oil and flush.
- The vacuum pump and flush equipment you will need is in our FREE Loan-A-Tool® program.
- Don't forget SAFETY! Wear goggles and gloves.
- Make sure you review all instructions included in the product box and available on Z-net.
- Register your air compressor in our database for a hassle-free nationwide warranty.

THREE BEFORE INSTALLING

- **Flush ENTIRE system**
 - Some models may require condenser be replaced.
- **Replace receiver drier/accumulator and expansion device**
 - Failure to replace these components is a leading cause of failure in the replacement compressor.
- **Distribute oil evenly throughout the components**
 - Hose
 - Accumulator
 - Receiver drier

FOUR AFTER INSTALLING

- **Manually turn compressor** 12 revolutions to distribute oil & lubricate compressor
 - Spanner wrench may be required
- **Evacuate and recharge system** to OE specs which are available in Z-net.

FIVE RECOMMENDED TOOLS

Gauges • Flush gun • Vacuum Pump • Spanner Wrench (PN-27000)
Compressor Turner Tool (PN-67700) • Haynes Repair Manual
