

## TRAILER WHEEL BEARING KITS

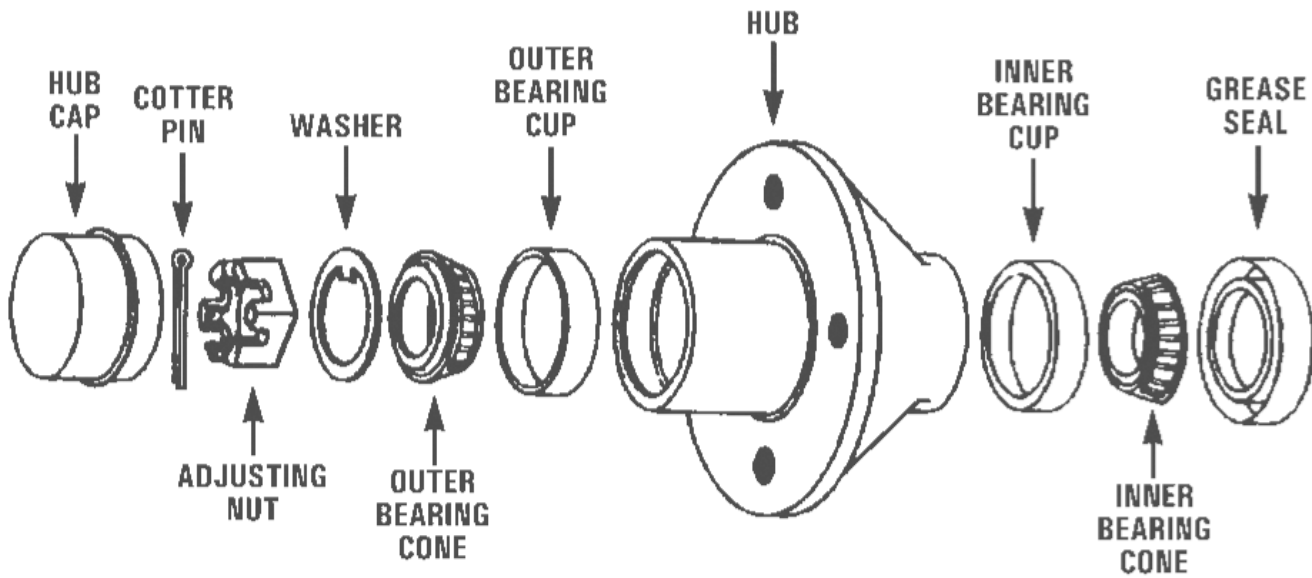

### Everything You Need in One Package

With constant exposure to elements like water, mud, grime and rough road conditions, your trailer wheel bearings can take a real beating. Corrosion and improper maintenance can dramatically decrease bearing life, leading to expensive damage to equipment, as well as lost work or leisure time. Don't take chances – replace your trailer wheel bearings before you have problems.

Timken® Trailer Wheel Bearing Kits provide everything you need to install a new wheel bearing in one convenient package. Two quality Timken® bearings, a grease seal, cotter pin and petroleum-based bearing grease are included in a complete kit to help assure durability and performance reliability.

Timken Trailer Wheel Bearing Kits are available for the axle sizes shown in the chart on the right.

### Trailer Hub Assembly

## TRAILER WHEEL BEARING KITS

Axle Size	Timken Kit Number	Component Description	Bore	O.D.	Width	Qty
1" Straight Axle	BT100	SET14				2
		L44643 (Cone)	1.000		0.580	
		L44610 (Cup)		1.980	0.420	
		203025 (Seal)	1.218	1.983	0.406	1
		Cotter Pin				1
