

Application: Application: Aplicación:

Chevrolet Tracker | Suzuki Grand Vitara, Vitara, XL7

Location of filter:

Behind glove compartment behind cabin filter access door on the passenger side of the vehicle.

Tools:

Unknown or not required.

To remove existing filter:

1. Open hood and disconnect the battery ground cable.
2. Allow 2 minutes for the air bag back up system to discharge.
3. Locate and remove the air bag fuse from the fuse panel located on the driver side of the vehicle.
4. Locate and disconnect the air bag electrical connector on the driver side by lifting up on the locking lever.
5. Open the glove compartment and push in on both sides of the glove compartment releasing the glove compartment stops. Swing the glove compartment downward.
6. Locate the passenger side air bag connector through the opening left by the glove compartment and disconnect it by lifting up on the locking lever.
7. Locate and remove the cabin filter access door.
8. Remove the two dirty cabin filters and replace.
9. Complete installation by reversing steps 1-7.

Make sure you reconnect the air bag connector on both the passenger and driver side of the vehicle. Make sure that you replace the air bag fuse located on the driver side of the vehicle.
