Boletín de Instalación

02-09

Application: Application: Aplicación:

Mercedes E Class with 124 chassis

**Location of filter:**

Under the hood in front of the windshield in the center of the vehicle under the cowl vent

**Tools:**

Unknown or not required

**To remove existing filter:**

1. Open hood.
2. Remove the splash guard on the driver side of the vehicle.
3. Reposition the hood weather strip half way from the driver side of the vehicle.
4. Remove the four screws securing the cabin filter cover and remove the cover and two splash guards.
5. Unclip the clips securing the dirty filter and remove the dirty filters.
6. Replace with clean filters and secure in place with clips.
7. Complete installation by reversing steps 1-4.
