

Application: Application: Aplicación:

Lexus GS300, GS400

**Location of cabin filter:**

Under the driver side dashboard on the side of the heater unit by the accelerator pedal behind the cabin filter access door.

**Tools:**

Unknown or not required.

**To replace existing filter:**

1. Pull the driver's side carpet (directly adjacent to the accelerator pedal) to expose the heater unit and cabin filter access door.
2. Locate the retaining tab on the top of cabin filter access door. Squeeze and pull out on the door and remove.
3. Remove the dirty cabin filter by pulling outward. Remove the second filter by pulling downward and then outward.
4. Install two new filters and complete installation by reversing the procedure.
