Installation Difficulty is High

The upper strut rod mounting nut is shaped like a cross and requires special tools for servicing (see photo). Order from AutoZone using #24365.

Using these tools will:

- Increase the safety of servicing the strut assembly
- Eliminate damage to important components
- Allow correct fastener torque to be achieved
- Improve the quality of installation

How to use the tools

Suggested Alternative:

ReadyMount #G57040 is recommended as an alternative to Ultra Strut #G56612 to avoid special tools for servicing.
