

# CAUTION!

## SPECIAL ASSEMBLY INSTRUCTIONS

*Failure to follow the instructions will void the warranty on this pump.*

**Important:**

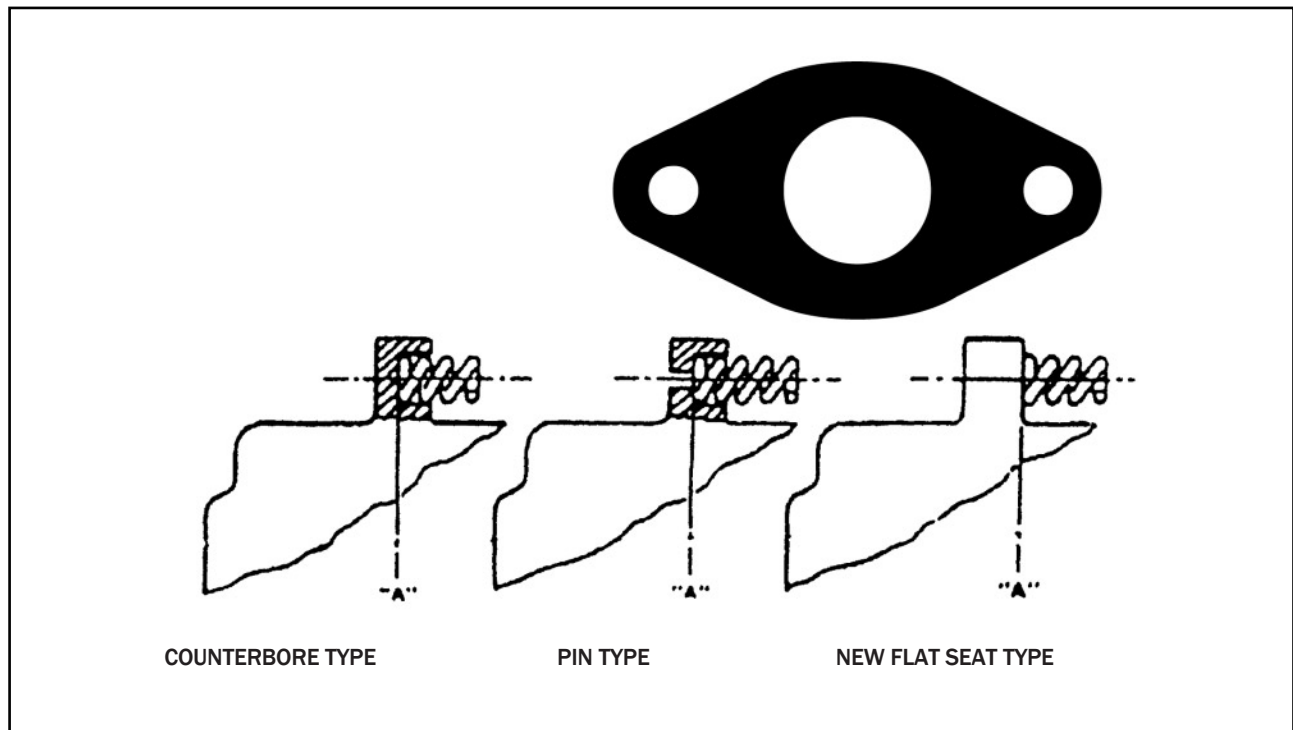

- This water pump replaces all previous water pumps used on 1.6 L and 1.9 L engines.
- Previous 1.6 L engine water pump designs provided a pin or a counterbore pocket to retain the timing belt tensioner spring.
- This new design provides a flat pad as a seat for the tensioner spring. The flat seat will maintain the same spring position and spring load provided by the pin or counterbore type when using the tensioner hardware existing on the vehicle.

(See illustration)

**Please note before installing:**

Use one gasket for 1.6 L engine

Use two gaskets for 1.9L engine
